Live Well, Do Good

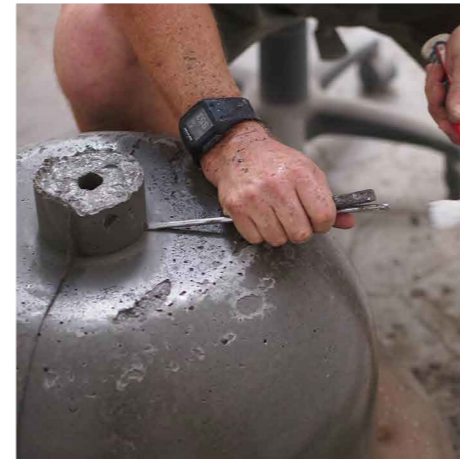

Raw Polished Eco-crete.
Infinitely customisable.

Mindfully
made,
crafted
to last.

DELLA
SANTA
STUDIOS

Della Santa Studios was born in 2016 when a small family dreamt of filling their home with beautiful tropical plants. With years of expertise in construction, they started creating bright, modern concrete pots never seen before on the island.

After witnessing the trash crisis on the island's beaches, founder and surfer Marcus Della Santa came up with **Eco-crete**. The aim was to upcycle as many post-consumer goods as possible into a material that is strong, lightweight and durable.

What started out as a hobby grew into a small business. *What became a small business evolved into a mission to help the environment, and feed the people of Indonesia, one planter at a time.*

eco-crete

Eco-crete is a mixture containing **75% recycled matter**, lighter than regular concrete but just as sturdy and refined.

Each one-of-a-kind Eco-crete product is made with 40-140 discarded plastic bottles, taken from the rivers, beaches and landfills in Bali. With every order, tons of plastic are recycled into homewares that make it possible for owners to experience a lifestyle that is both stylish and eco-conscious.

Pertinently, the creation of Eco-crete does not involve melting plastic, thus avoiding the release of toxic byproducts into the environment.

Our Eco-crete products are
Hand-Poured, Hand-Polished and Hand-Painted,
Championing quality over quantity,
Slow living over mass-consumerism.

Every single finish is unique,
Exquisitely made with care and made for life

Let Your Home Reflect a Vision of the World We Want to Make.

Hand Poured.

Hand Polished.

Hand Painted.

Dream + Design + Deliver

Each order is bespoke; we delight in discussing creative visions with you, and the rigour of realising each order in perfect detail.

Samples and volume manufacturing are available within Indonesia and internationally.

Take your time. Pore over our updated projects at [@dellasantastudios](#), discover our recycling factory at **26 Padonan, Canggu**.

Our Planters Rest Lightly
upon this Earth.

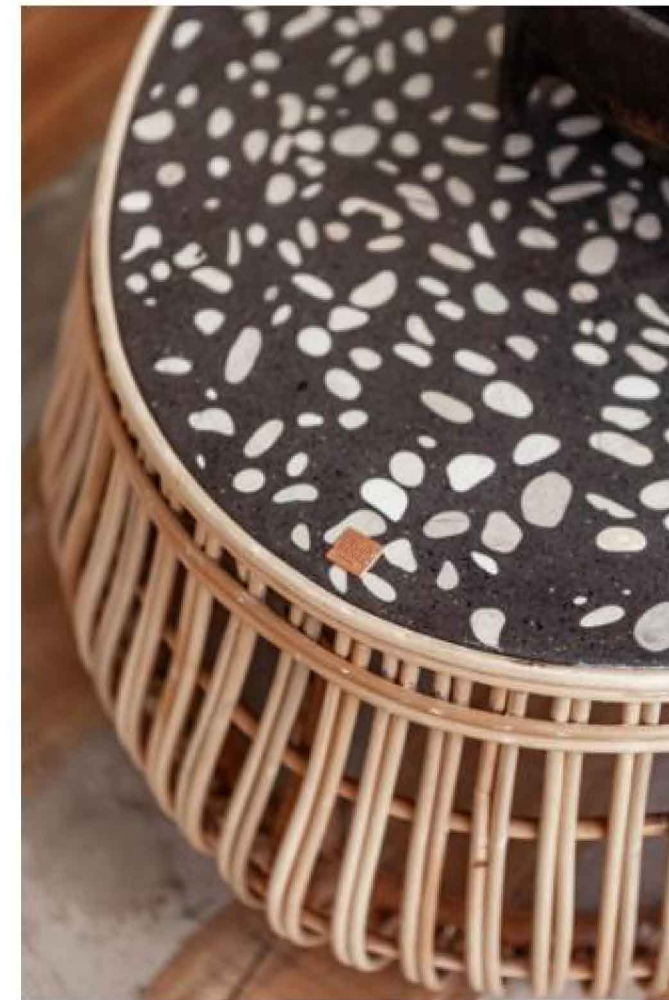

A Perfect Mix

We are proud to unveil a new Eco-crete formula - designed for hardy and functional surfaces, incorporating urban waste into the dignified beauty of age-old terrazzo.

Functional, beautiful
and entirely customisable.

Bringing the **Outside** in.

As we live and flourish along the black sand coasts of Bali, the wellness of the ocean is central to our vision. We delight in transforming beach debris into heirlooms, taking the lead from Indonesian gatherers turning driftwood into recycled furniture.

By re-thinking and re-imagining the potential of traditional plastic waste, we are molding new possibilities for the future of plastic recycling in Bali.

COFFEE TABLES

LARGE TABLE

Height 30cm

Raw & Painted Planters

From soft pastels to bold monochromes, to sublimally raw poured Eco-crete, we have developed a portfolio of timeless designs meant to transcend and outlast trends.

This is our long-standing dedication to conscious consumption, and a sincere tribute to modern Balinese creativity.
